Work Experience

Have been working as Software Engineer at LG soft India from past 1 year and gained experience in the following fields:

- Browser and Downloads Application on Android platform.
- Data Framework and connectivity.
- Played significant role in customizing browser and framework for flagship LG mobiles [LG-G3 and its variants]

Projects

- **Information Dispersal And Reconstruction In Storage System | Major Project**
Computationally divide the data into pieces and stored in server so while retrieving user need only few slices retrieve the whole data.
This project has been awarded as "TCS Best Project award".
 - **Mobile Shop Management System | Mini Project**
Maintain a database of whole mobile shop, capable of identifying both administrator and user. Permission is provided to admin for add, delete and modify items, customer supplier item, generate reports and bills
 - **Magie Browser(Web Browsing Through Voice commands) | Major Project-Diploma**
Designed to navigate browser through voice commands. This project will be helpful for disabled people to interact with browser
 - **Phone capability generator -TOOL | LGSi**
This tool is developed to save the time, for extracting the user agent from phone it used to take lots of time, so with this tool we can extract user agent for various regions and operator with single click
-
