Projects

Zonar Ground Traffic Control GTC 4.0 | www.zonar.com | Fleet management | October 2014 - present

GTC 4.0 is the Fleet Management System. It receives live vehicle data from the zonar devices installed on the vehicles, and then analyze data and generate actionable reports .

- Skills : Object Oriented Javascript, BackboneJS, Marionette JS.
- UI Team Size: 8

Litehouse BlueNile Project | www.bluenile.com | E-commerce | Sep 2014 - present

It's a small project. Wherein we are converting existing promotional mailers of the client to responsive mailers. Till date we have delivered six such mailers.

- I completely own this and I am doing the coding for responsive mailers and integration of that with script called AMPScript using tool Exacttarget by Salesforce.
- Skills : Responsive design, html5, css, Responsive table layouts, AMP Script
- Team Size : 5

Blogosphere & STC home & Reports | Symphony Internal project | June 2014 - July 2014

Blogosphere is the blogging site for the STC and Aditi employees. I have worked on the UI of the site. I have converted the given design into html and css.

- I played the role of UI developer for the STC internal project team which is called Cedar team. It involves working on the multiple project for UI. So I worked on the UI for three ongoing project.
- Skills : HTML5, CSS, Bootstrap, Javascript, JQuery

Genesis mobile lobby | Ladbrokes <http://www.ladbrokesplc.com/> | Gaming and Betting | October 2013-May 2014

Mobile site is going through the transition from vendor openbet, mfuse to another vendor playtech. There are changes and enhancements in the current implementation of login, banking, registration and the mobile site UI to support the new vendor playtech.

Role, Responsibilities and challenges

- I worked on the home page of the mobile site.
- I worked on developing the CMS for home page and the page footers.

Mobile website development/enhancements | Ladbrokes <http://www.ladbrokesplc.com/> | Gaming and Betting | Feb 2012-Present

Mobile version of there online portal. It supports mobiles and tablets in iOS and Androids.

Role, Responsibilities and challenges

- Ensuring timely releases without compromise in quality code.
- Mentoring the peer developer and doing the code review.
- Requirement collection, analysis, estimation, development, continuous coordination with the onsite team.
- I have analyzed the requirement of cms and then designed its DB.
- I have worked on the integration of cms with the frontend.

Examples of work : mobile.ladbrokes.com

POC for test driven development (TDD) and behavior driven development (BDD) | Ladbrokes | 1 month long project

We have identified the areas in the legacy code where we can implement the unit test cases. I have implemented TDD

with PHPUnit and generated the reports with code coverage on the legacy code.

Role, Responsibilities and challenges

- Creating the POC on TDD and BDD withing 10 days for demo to the client.

Visa-Mandate project in mobile lobby | Ladbrokes | oct 2012 - jan 2013

This requirement is to make the mobile site PCI compliant. So we have migrated our banking functionality to different third party vendor which is PCI compliant. We have used WSDL, SOAP requests, SOUPUI, PHP SOAP client for this project.

Role, Responsibilities and challenges

- I was responsible to analyse the adhoc and incomplete requirements. That involved lots of interaction between the onsite team of architect and manager.

Examples of work : mobile.ladbrokes.com/lobby/banking

Vampirewars Social Game | Zynga | jun 2011 - sep 2012 | <https://apps.facebook.com/vampiresgame> | vampirewars on myspace

This project was for the development and maintenance of social networking game vampirewars. It was available in various social networking sites like facebook and myspace.

Role, Responsibilities and challenges

- I have owned the complete Release process work of our project and complete development part which involves new feature design, implementation .
- I have looked into the operation tasks of monitoring the load of web server, MC server and the MQ server.
- Finding the security loopholes and fixing the security related issues like CSRF , mysql injection , XSS attack was challenging.
- Handling the bot attack.

MIS (Management of information system) | Tally solutions | oct- 2010 - may 2011

This project was about providing the MIS solution of sale of Tally accounting software by the tally partners and various other sources.

Role, Responsibilities and challenges

- Analyzing the business data. Mining the relevant data . Then come up with various analysis crucial for all the actors in the ecosystem.
- worked a lot on Query optimization in MYSQL. Presentation of analysis using PHP, javascript, jquery.

HRMS (Human Resource Management System) | Tally solutions | sep 2006 - oct 2010

It's a complete HR solution for HR team as well for the employees. It has modules like Employee , Attendance, Leave , Special Benefit, Attendance, Work Stream and Appraisal.

Role, Responsibilities and challenges

- I was the module owner for Employee, Leave, Holiday, Travel in a team of 8.
- We need to collect the requirements directly from the stake holders and then first come-up with the mock-ups.
- I have worked in all the aspects of the project which includes frontend as well as backend.
