A Quick Me

“Passionate programmer with an eye for detail & new languages!”

If I had to sum up my resume in less than 10 words, I would be glad to say the above.

Having a rationally clear logic, with a complete open mind to learn different programming languages, it becomes a win win situation for a college to have me work with them on a research project.

Having a good flair for technical skills, I look forward to being a part of your team & explore mutual synergies, albeit for a short while currently!

Professional Profile

- Currently in my 3rd year(5th sem) pursuing Btech in Computer Science engineering from **Vellore Institute of Technology (VIT)**, Vellore.
- Have been in the programming background since my 8th grade (7 years now).
