SUMMARY:

Two years as a Software Developer. I'm a UI developer and Script Engineer. I only take up work which I feel strongly about and always ensure that I contribute than code. I love working for product or web services based startups and on open source products.

JS PROJECTS

TS Handheld: This is completely Ticket Simply product, This is mobile version web application. Ticket Simply Handheld is for agent login for mobiles. This is based on Ticket Simply functionality, user can login and book the ticket, generate the reports, cancellation of tickets.

- **Experience:** This is second project of my mobile web applications. Here i'm using cookies concepts for storing the user data & privileges . These Privileges we getting through ticket Simply API's. This application supports all mobile browsers like opera, opera-mini, apple-safari, android web page ..etc..
- **Keywords: JQuery, JQuery Mobile, Nginx server, Javascript, HTML5 & CSS3**

Ysg Hubs Handheld: Is one of its kind mobile version web app for YSG Hublet. The YSG Hublet is a physical outlet of YSG Hubs where you can pick up items bought on the YSG Hubs app. These hublets can be found in major academic institutions across Nigeria.

- **Keywords:** jQuery, jQuery Mobile, Twitter Bootstrap, nginx, Javascript, HTML5 & CSS3
- **Experience:** JQuery gave me the opportunity to work on the concept of mobile version web apps . I had to do a lot of multi-tasking as the application had to be designed,. I first started with a list of tasks and then broke them onto small sprints of 3 hours each the way its done in SCRUM. Every 3 hours I would evaluate my progress and plan the next sprint. This was also the first time I deployed a JQuery mobile web app successfully on a live. Capistrano saved my day as there was a small bug with my code which I fixed at the last minute and hit 'cap deploy' just at the right time.

RAILS PROJECTS

Hotel Simply: Hotel Simply is one of the big product for Bitla. It is simplified the hotel booking system, like front desk office, point of sales, material controlling management, taxes management, Room & Block Management.

- **Experience:** I started as hotel simply at middle of term like UI & UX changes to be done, here i'm using Twitter Bootstrap library files to change the UI. After that we released Channel Manager. CM is free version of HS. I hope this is still going on in market. Here I created one jQuery plug-in called booking calendar (I call it as bcal). This bcal uses to display all the rooms and blocks, to show the availability of hotel rooms in single page.
- **Keywords: Ruby, ROR, MySQL, Twitter Bootstrap, JQuery, Javascript, HTML5 & CSS3**

Ysg Properties: YSG properties has been rated as one of the biggest complex in West Africa. No wonder to say, that we are maintain the one of the top most company in property called “YSG (young shall Grow)” which consists more than 1500 properties* fro Rent all around West Africa. Our Software Designed in such a way that helps the company to maintain the huge date base of Tenants ans properties. We have a Flexible Billing structure which is completely satisfied by the customer on posting invoices to tenants. So far we achieved a lot but still we aims at bringing more comfort to our Beloved Clients and customers.

- **Experience:** It started as a set of scripts which I would write late at night and on weekends which later went on to become one of the highlights at Bitla. Stored procedures were used to load data in the database.
- **Keywords:** Ruby, Ruby on Rails, MySQL, Twitter Bootstrap(Unicorn Theme)
