<b>Client</b>	Google Play
<b>Technology</b>	Android
<b>Team Size</b>	10
<b>URL</b>	<a href="https://play.google.com/store/apps/details?id=personality.guide.app">https://play.google.com/store/apps/details?id=personality.guide.app</a>

<b>Project Description- Pin Point (mobile App),</b>	Our system provides an efficient way to track someone's location with due permission from the person. In today's world where phones have become increasingly handy, this application does not solely rely on GPS for tracking location. With accurate knowledge of other persons location, a person can schedule the delay in the meeting accordingly or a parent can keep a track of child whereabouts. This application when hosted on web server can prove even more efficient. By using easily available open software, we provide a solution to an efficient tracking of a person.
<b>Role</b>	Module design Developed the programs for its functionalities. Responsible for implementing various research methodologies to help gain understanding of user needs and behaviors.
<b>Client</b>	Google
<b>Technology</b>	Android
<b>Team Size</b>	7

<b>Project Description- IFALL (mobile Fall Detecting application)</b>	Our system provides a viable solution to fall detection. Using existing, mass marketed technologies will limit cost making it available to the majority of the public. Implementing proven fall detection algorithms makes the system highly reliable. Reliability and reduced number of false positives means greater adoption by emergency services. The importance of the cell phone in everyday life decreases the chances of being forgotten. Everyday interaction with the phone makes the interface more familiar to the user. A cell phone is also less intrusive than dedicated devices.
<b>Role</b>	Module design Developed the programs for its functionalities. Responsible for implementing various research methodologies to help gain understanding of user needs and behaviors.
<b>Client</b>	Google
<b>Technology</b>	Android
<b>Team Size</b>	5

<b>Project Description-Online Recruitment</b>	<b>Online Recruitment Application</b> may be described in one word as “many in one”. The intent of the application is to create an online recruitment application to help jobseeker to look for job. It offers the most powerful end-to-end toolset for increasing placement ratios. The <b>real</b> strength and power of online recruitment, when done properly, lie in harnessing internet technology to not just attract candidates but to deal with them too. In this sense it is also about streamlining the recruitment process -so busy HR departments can give a better recruitment service to their colleagues in finance, marketing, sales and manufacturing. Plus it frees up more of their time for more value-added tasks.
<b>Role</b>	Coding, testing and Responsible for implementing various research methodologies to help gain understanding of user needs and behaviors. Should be skilled in developing accessible content and features.
<b>Client</b>	Google
<b>Technology</b>	Android
<b>Team Size</b>	5
