Name

Gender

Birthday

Email

Books read

Movies seen

Best three Friends

Top three Apps used

TripPon : A travel help application made in 24 hours for the THack Bangalore 2014 using amadeus API, google maps api and holidayIQ Apis . Get flights info , hotels info , car rentals and

sights to see before you visit the place , The USP being an offline local phrasebook , emergency contact details and safety tips for new visitors at a place

BTech Main Project : “TRAP TOM” – An Interactive Logical Game. An application for a single player, multi level interactive egame based on the implementation of Graph Theory.

The idea of the game is inspired by the classical game of Quadraphage played with a single king on a chess board. The quadraphage devours one square per turn. The objective of the king is to avoid being trapped by the quadraphage.

In our project, the board is of arbitrarily large size and the king is made smarter by the use of an efficient algorithm based on graph theory.

BTech Mini Project : Shopping Complex Management System with front end in Java and back end in SQL

BTech Seminar : Computing co-operative solutions for Coalition Skill Games

Academic Profile

COURSE	INSTITUTION	BOARD/UNIV	YEAR OF PASSING	MARKS
B-Tech, Computer Science and Engg.	College of Engineering, Trivandrum	University Of Kerala	2014	CGPA 8.10
