**Career Objective** To work in an organization with skilled people where I can apply my knowledge into practice to help the organization in the best possible way I can and to enjoy my work .

Work Experience	Designation	Company and Work	Tools Used
	Mobile Developer (Aug 2014-Present)	Zopnow: Developed two internal apps StoreManager and StorePicker	Android SDK, Eclipse, SQLite, JSON Parsing
	Lead Android App Developer: (June 2014-Present)	Aincubate Innovations: Built the android client app SnapShopr for a computer vision back-end	Android SDK, Eclipse, SQLite, JSON Parsing
	Internship: PL/SQL Developer (Jan 2014-May 2014)	Texas Instruments: Worked in Data Warehouse and Business Objects platform to solve Inventory Aging and e-Store Feed problems	PL/SQL Developer, Oracle, Business Object Universe Designer, BO InfoView

Education	Degree	Institute	Percent/CGPA
	MCA (2014)	Vellore Institute of Technology	9.09
	BCA (2011)	Bharati Vidyapeeth University, Pune	71.76%
	12 <sup>th</sup> CBSE (2008)	DAV Public School	72.5%
	10 <sup>th</sup> CBSE (2006)	DAV Public School	89.8%

**Android Apps** **SnapShopr** - A visual search app for fashion shopping.

As an Android Developer, I built the client-side application from scratch to include user interfaces, network, custom camera, image handling, JSON parsing, navigation drawer, dynamic layouts using adapter, background threads, social APIs integration and storage components.

Playstore link: <http://bit.ly/1z>

SnapShopr won the Best App Runner-up at Google App Expo 2015.

**Store Management**-Internal App

It allows the store manager to manage the store related work such as changing the stock value of an item from the app and then syncing it on the cloud.

**Store Picker**-Internal App

It allows the store picker to pick items corresponding to a particular order came from the customer.

MCA  
Minor Projects

**Employee Leave Management Portal**

Designed a system for Employee Leave Management Portal using Servlets, JSP and JDBC in Netbeans.

**An Ascii Chain hosted on Google App Engine**

Its an ascii chain where anyone from the world can put any ascii art and it will be stored in the database.And the top ten will be shown in the page.Also it shows in the map the location from where anyone is posting.

Used Python,Jinja2,Google App Engine. Link: <http://richa-khanna.appspot.com/>
