Varun V Subramanian

I am a front-end engineer with 3 years' experience. I have expertise in various web technologies and in RIA development. I have a fervency for well organized, well written and maintainable code.

Experience

Pramati Technologies Pvt Ltd [Sep 2013 – Present]

Position: Development Engineer

Project: Baynote VUE

Baynote is a SaaS company which provides solutions to eCommerce environments for personalized product recommendations to deliver a personalized shopping experience. The Baynote VUE is a self-service web application custom built for online merchandisers to respond quickly to catalog changes, market conditions and trends while easily tracking the performance across widgets, products and categories.

Contributions:

- Development of several components and modules for the product
- Effective use of BackboneJS in conjunction with RequireJS to deliver an AMD approach for easy maintenance and development.

Vanenburg Software India Pvt Ltd [May 2011 – Aug 2013]

Position: Software Engineer

Project: Collabrr (www.collabrr.com)

Collabrr is an internet based social business networking and collaboration service which enables enterprises to connect to each other, and collaborate by exchanging business documents.

Contributions:

- Active member in the architectural and functional design of the product
- Development of the core UI framework for Collabrr
- Development of the MVC pattern framework for the frontend stack of Collabrr
- Effectively used design patterns of JavaScript to develop various libraries in the frontend stack
- Implemented responsive design of the product for various devices in the market
- Design and development of the UI and the front end framework in an unobtrusive, reusable, modular and multi-browser capable manner

Project: Documentation System for Collabrr (help.collabrr.com)

Designed and developed the framework for the documentation and help pages of the product. This is designed in a way to ease the content providers to update contents even without any technical knowledge.

Contributions:

- Effective use of Drupal to ease the management of documentation system
- Effectively implemented translation service for the help system so as to provide easy translation on demand
- Intelligent design of documentation system for effortless use by a content author
- Custom theming of the system so as to suit the customer requirements

Project: Website of Vanenburg Software (www.vanenburgsoftware.com)

Was part of the team for the design and development of Vanenburg Software portal.

Contributions

- Developed fully functional modern website for Vanenburg Software that has more than 20 screens.
- Integration with social platforms like Twitter, Facebook, YouTube etc.
- Developed rich features like news feeds, events etc.

Technical skills

- Web Technologies: Core JavaScript, HTML, CSS
- Expertise in modern JS technologies such as BackboneJS, RequireJS, AMD design pattern
- Working knowledge over AngularJS - “The Angular way of thinking”
- Knowledge in JavaScript Framework Development, Web UI components, responsive design, HTML5, CSS3, jQuery, RIA, SaaS, SOA, BPM
- Build tool – Grunt.
- Content management systems such as Drupal, Wordpress, Moodle
- Passion for Linux and to work in a Linux based environment
