Profile

I wish to introduce myself as a diligent, committed and dynamic individual with a technical aptitude and good communication skills. I have completed my graduation in Engineering (B.E – Electrical) from Gujarat University. I have an excellent academic record and have performed well consistently.

I have the ability to work well in teams and have been a productive self-starter with a strong work ethic. I possess hands-on experience working through all the stages of system development, including requirements definition, design, development, testing and support.

Career Objectives

My objective is to build a technical career with a leading professional organization that would provide me an opportunity to utilize my skills, knowledge and potential. I would be happy to work as a key player in a challenging and creative environment that would enable me to apply as well as enhance my skills. I aspire to achieve excellence in my field and contribute to the growth of the Company.

Academics

Qualification	Board/ University	Month/ Year
B.E (ELECRICAL)	Gujarat University	Jun 2010
H.S.E	Gujarat State Board	Mar 2006
S.S.C	Gujarat State Board	Mar 2004

Software Skills

Language	:	Java, XML, HTML, JavaScript, Objective-C
Technologies/ Framework	:	J2EE, Struts2, JAX-WS, iBatis, Cocoa
Database	:	Oracle, MySQL
Tools/ Utilities	:	Ant, soapUI, Tortoise GIT
Application Servers	:	Apache Tomcat, jBoss 5.1.0 GA, Oracle Weblogic 10/11g
Operating Systems	:	Windows- XP, Vista, 7, 8, Linux

Certifications:
During my graduation, I have cleared the Competency Tests in C++ organized by the Government of Gujarat.
I have also completed the Oracle Certified Java Professional (*OCJP*) exam.

Professional Experience

Tata Consultancy Services   **2011 – Present**
Systems Engineer
During my tenure here, I have worked as a Programmer Analyst in the Financial Services vertical. In the BFS sector, TCS provides Financial Solutions with its host of applications under the banner of TCS BaNCS.

My first project was a client implementation that involved a replacement of the Back Office application of Deutsche Bank with TCS BaNCS product. As part of the integration team here, I had developed web services using JAX-WS which were consumed by a third party application. These services were designed and developed working with the business teams after understanding the client requirements. After development, I extended support throughout all the testing phases namely, IAT, SIT and UAT.
After this implementation moved to production, I joined a new team which is engaged in setting up and integrating all the TCS BaNCS suite of products. This environment was used for end-to-end demonstrations to prospective customers. The integration involved writing web services, servlets, JavaScript to establish communication across applications. I have even developed web applications which include one that graphically displays bank statistics for Business Analytics, an application for easy Credit Card application. I attended a workshop on iOS development held by IEEE Bangalore and post that, I've developed an iOS application also. Apart from these developments, I was a part of the team which was responsible for maintaining application servers. Hence, I have experience working with Weblogic, jBoss, Apache Tomcat and Oracle 11 database.
