About

Now a product manager. In past, a tester who tamed the Code to get things done.
Love breaking & fixing the software product. A startup guy at heart. Interested in
working on the product around latest technology and Open Source projects.

Work

Oracle
2014-01-01 —

Senior Product Manager ()

Came to Oracle after BitzerMobile acquisition. Changed my roles & responsibility here and currently working in the capacity of Senior Product Manager our OMSS solution (rebranded version of our product).

Highlights

- Now involved in defining the roadmap for the product & process
- Product Demo for Customer
- Ramping up the Sales team in India/APAC region
- Managing the support for our existing product and training the support team

Bitzer Mobile
2012-04-26 — 2013-12-31

Senior QA (QA Lead) ()

Joined the Bitzer Mobile R&D India team as early employee. Later was leading the team of 5 QA members (3 India + 2 US). Setup the Automation of Server & Client component and integration with jenkins. Also was involved in Product Management, Sales Engineering(Customer Demo) & Support. Managed one of our key Indian client.

Highlights

- We were building the solution to enable BYOD phenomenon in Enterprise market.
- Build the QA team and improved product quality 10x in first handled release.
- Server automation using Python
- Client App (iOS & Android) automation using the Appium with Python
- While evaluating mobile automation software found Appium and was one of the initial contributor to the project.
- Learned Objective-C & Android app development.

Thomson Retuers   2010-04-01 — 2012-03-14

QA Engineer & Senior QA   ()

Joined the new team which who were starting with the Web Services integration
of the existing product. Built the knowledge around the Finance product and the
SOAP webservices. Bought the soapui tool (free version) for manual/automation
testing of the SOAP API. Built the knowledge and gained expertise. Shared the my
knowledge through my blog.

Highlights

- Started API testing and built the automation framework which intergrated
  the test results from API automation to the UI automation. All this was
  achieved using the soapUI tool & Groovy script.

- Published my blog http://learnsoapui.wordpress.com sharing the
  knowledge which was gained in process. It got hit 60,000+ views in first
  year. Current stat is 355,824 views

- Joined Product Adivsory Board Member at eviware(now SmartBear). The
  same company who built the soapUI tool.

- Conducted various internal training on soapui across teams & region.

SAP Labs India Pvt Ltd   2007-09-26 — 2010-03-04

Software Engineer   ()

Joined as a fresher and worked on various things ranging from SAP Basis
consultant, Business object subject matter expert & non-functional tester.

Highlights

- Worked as tester for the non-functional product standard.

- SAP Basis Consultant and trainer at Labs India.

- Won the spot award for my peformance in SAP Netwaever product release.

- Team award for consistently being the best performing team among 300
  people.
