PROFESSIONAL EXPERIENCE

Company: mscripts System India Pvt Ltd
Duration: Sep 2014 - Present

Project Name: my Pharmacy
Team Size: 8
Technologies: Appcelerator, Javascript

The project involves creating a base product for mscripts using appcelerator titanium. This product aims at driving digital patient engagement through our innovative, easy-to-use mobile health management platform. The new features of the hybrid app are adherence, medication tracker, reminders, homepage templates, refill by scan, analytics, notification panel, etc.

My responsibilities includes:

- Agile product development – coding modules as needed.
- Manage an experienced development team of 8 members.
- Mentor team member into technology.
- Contribute in the creation of detailed technical design documents.
- Assist and manage the product implementations.
- Perform code reviews via Review board.
- Provide technology recommendations for potential product application development.
- Troubleshoot issues related to new or existing code/systems.
- Define high level UI architecture, best practices, guidelines and standards that balance short term and long-term objectives in a practical manner.
- Ensure developed products meet milestones, and effectively communicate status through participation in Agile

Company: Aditi Technologies Private Limited
Duration: Jul 2013 to Aug 2014

Project Name: My Thomson
Team Size: 12
Technologies: Appcelerator, Javascript, Node ACS

The My Thomson app has everything you need for your holiday in one place – anytime, anywhere, any way, including:

- A personalized holiday countdown
- The weather where you're going
- Your full holiday summary
- Inspirational destination guides
- The top must sees
- Extras and excursions
- A handy currency converter
- An editable holiday checklist

My responsibilities includes:

- Agile product development
- Coding modules
- Mentor team member into technology
- Assist and manage the product implementations
- Define high level UI architecture, best practices, guidelines and standards that balance short term and long-term objectives in a practical manner.

Project Name: Thomson View Maker
Team Size: 7
Technologies: Appcelerator, Javascript, Node ACS

Thomson View Maker is your place to capture, share, and store your holiday moments. You can record a new video from scratch, or upload an old one from your camera roll. You've then got the option to tag, write captions, and share via Facebook with friends and family.

My responsibilities includes:

- Agile product development
- Coding modules
- Mentor team member into technology
- Contribute in the creation of detailed technical design documents.
- Assist and manage the product implementations
- Define high level UI architecture, best practices, guidelines and standards that balance short term and long-term objectives in a practical manner.

Company: Freelance Consultant
Duration: Apr 2011 – Jun 2013

Project Name: ETC Product Portfolio
Team Size: 2
Technologies: Appcelerator, Adobe Air, Javascript, PHP & MySQL

This application was developed for Desktop (Mac & Windows), Smart Phones & Tablets (iOS & Android) as a portfolio of all ETC products showcased to the ETC customers.

My responsibilities includes:

- End to end product development
- Designed and developed app for all major platforms (Desktop, Smart Phones and Tablets)
- Coding modules on both server and client side
- Interact with client, gather requirements and bring them live.

PERSONAL DETAILS:

 - Date of Birth: 24th August 1992
 - Language: English & Tamil
 - Address: #3, 5th Cross, Swimming Pool Extension, Malleshwaram, Bangalore, Karnataka, India 560003
