WORK EXPERIENCE

Associate Engineer – Product Development | **CommVault Systems ▶ Hyderabad** | July2014 – Present

- Working on web related projects for helping internal infrastructure requirements of the company like the leave management and candidate management systems.

- Also working on an MDM project on the iOS platform to develop an app for the TimeOff System.

Intern – Product Development | **CommVault Systems ▶ Hyderabad** | December 2013 – February 2014

- Learned different technologies by pairing with experienced engineers.

- Developed a software to semi automate the campus recruitment and lateral hiring process at Commvault Systems.

DETAILS OF MINI PROJECT

Hospital Management System: The project was mainly intended to develop database software with user interface for managing the records in a hospital. Computerized health records management system takes care of all the requirements of an average hospital and is capable to provide easy and effective storage of information related to patients as well as staff of the hospital. An administration point is created to administrate and monitor all activities of the hospital. Each department has its own rights assigned by the administrator .No operator can access data beyond his/her rights. It was developed using JAVA on Windows platform.
