WORK DETAILS

Currently employed as **Software Engineer with Tricon Infotech Pvt. Ltd**., Bangalore from Sept 2012 till date.

PROJECTS

- **PROJECT TITLE :   Cherry – Cherish Your Memories (Aug. 2014 - present)**
  Cherry is an Android App which helps you to 'Create', 'Collaborate' and 'Preserve' your personal photos as everlasting memories. It allows you to create a memory, add members who are part of the memory from the contact list stored in the phone and then members can add photos to the memory. It is the product of Tricon Infotech Pvt. Ltd.
  App Link: https://play.google.com/store/apps/details?id=com.triconinfotech.labs.cherry&hl=en
  Role and Responsibilities:
  1. Lead Android Developer.
  2. Participation in all phases of Product Development Cycle.
  3. Developing App with Material Design.
  4. Integration with server API's.

- **PROJECT TITLE: Memrousel (May. 2014 - Aug. 2014).**
  Memrousel is an Android App which helps users to group their related personal photos and form a beautiful memory. Users can either add photos of their gallery or can capture photos from the in-app camera. Users can also apply color effects on photos. It is the product of Tricon Infotech Pvt. Ltd. This app is currently not published on Play Store but can be showcased on mobile.
  Role and Responsibilities:
  1. Participation in all phases of Product Development Cycle.
  2. Solely responsible for development of the App.

- **PROJECT TITLE: Vohple (Feb. 2014 - May. 2014).**
  Vohple is an Android App which allows users to tag photos at their current location as a public memory. App will notify users when they are near to the location where memory was tagged. Users will be able to see memories based on their current location. It is the product of Tricon Infotech Pvt. Ltd. This app is currently not published on Play Store.
  Role and Responsibilities:
  1. Participation in all phases of Product Development Cycle.
  2. Solely responsible for development of the App.
  3. Integration with server API's.
  4. Used Google Maps and Location API's.

- **PROJECT TITLE: CK-12 studyNow! (Sep. 2013 - Feb. 2014).**
  StudyNow is an intuitive android app that helps students learn, do homework and research for projects. Teachers can use this app to help keep their kids engaged within the class room and find supplemental material for their class. Students can learn K-12 concepts in multiple ways like read, video, images, quizzes etc. This app was made for CK-12 Foundation. This app is currently not published on Play Store but can be showcased on mobile.
  Website Link: http://www.ck12.org/
  Role and Responsibilities:
  1. I was solely responsible for starting android development segment in my company by learning the technology from scratch for this project.
  2. Developed app using SQLite database.
  3. Integrated sign-in with social websites like Facebook, Google+ and Twitter.

- **PROJECT TITLE: McGraw-Hill Connect (Sep. 2012 - Sep. 2013).**
  McGraw-Hill Connect is a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes. This is the McGraw-Hill Education Project.
  Website Link: http://connect.mheducation.com/
  Role and Responsibilities:
  1. Worked on various modules which include Assignment Policies, Review assignment, Gradebook, Student Time Spent Report, E-Book Policies and Student Performance Page.
